## Work Experience

### QA Automation Lead • Routetitan

June 2021 - Present

Routetitan is a Dutch-based company that offers a fleet management system and route planners.

(<https://routetitan.com/en>)

I am responsible for:

- Implement QA Automation from scratch.
- Coaching and leading the team for all the QA-related activities (Includes Automation and Manual).

### QA Automation Engineer • Snapp

January 2020 - June 2021

Snapp is the biggest and leading smart transportation/delivery/booking SuperApp in Iran and the Middle East.

(<https://snapp.ir/>)

I was responsible for:

- Implementing and maintenance automation test codebase using pure Python/Selenium/Appium/Robotframework, etc.
- Run the automated test-cases against Snapp App/WebApp/API
- Working with Snapp's backend including Database, APIs, Cloud Environments and etc to ensure the maximum test code coverage
- R&D on QA Automation developing to solving challenges and to be updated with the latest technologies.

### QA Lead • Tadbir Gostaran (Badbadak)

August 2017 - December 2019

Badbadak (Tadbir Gostaran Behine Saaz) is one of the successful companies with multiple products based on the development of applications, websites, and games. Reporting directly to the CEO, I have been working for several years here. Also, I have established the QA department in TGBS. (<http://badbadak.ir/>)

Main responsibilities:

- Managing QA flows and all test-related activities.
- Leading the QA team, training them, and define the responsibilities for persons.
- Create Test plans based on the project requirement documents
- Develop the QA tools with the last technologies.

- Write and run Automated/Manual tests including functional and non-functional. Such as performance, acceptance, regression, UI automation, etc.
