QA Automation Engineer • Snapp

January 2020 - June 2021

Snapp is the biggest and leading smart transportation/delivery/booking SuperApp in Iran and the Middle East.
(https://snapp.ir/)
I was responsible for:
-Implementing and maintenance automation test codebase using pure
Python/Selenium/Appium/Robotframework, etc.
-Run the automated test-cases against Snapp App/WebApp/API
-Working with Snapp's backend including Database, APIs, Cloud Environments etc, to ensure the maximum test
code coverage
-R&D on QA Automation developing to solve challenges and to be updated with the latest technologies.

QA Lead • Tadbir Gostaran (Badbadak)

August 2017 - December 2019

Badbadak (Tadbir Gostaran Behine Saaz) is one of the successful companies with multiple products based on the
development of applications, websites, and games. Reporting directly to the CEO, I have been working for several
years here. Also, I have established the QA department at TGBS. (http://badbadak.ir/)

Main responsibilities:

-Managing QA flows and all test-related activities.

-Leading the QA team, training them, and defining the responsibilities of people.

-Create test plans based on the project requirement documents

-Develop the QA tools with the latest technologies.

-Write and run Automated/Manual tests including functional and non-functional. Such as performance, acceptance, regression, UI automation, etc.
